

Growing With You Since 1926

## **Tiny Tower® Arborvitae**

*Thuja 'MonRig'*

Height: 20 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 4b

### **Description:**

A handsome, compact, upright evergreen that grows uniformly and maintains a tight shape; perfect for privacy or wind screening; very resilient and resists ice and snow damage, grows in almost any soil type

### **Ornamental Features**

Tiny Tower Arborvitae is primarily valued in the landscape for its distinctively pyramidal habit of growth. It has rich green evergreen foliage. The scale-like sprays of foliage remain green throughout the winter.

### **Landscape Attributes**

Tiny Tower Arborvitae is a dense multi-stemmed evergreen tree with a distinctive and refined pyramidal form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Tiny Tower Arborvitae is recommended for the following landscape applications;

- Accent
- Vertical Accent
- Hedges/Screening

### **Planting & Growing**

Tiny Tower Arborvitae will grow to be about 20 feet tall at maturity, with a spread of 5 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

Growing With You Since 1926

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.
