Height: 6 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 4b

Group/Class: Shrub Rose

Description:

A highly fragrant and moderate rebloomer presenting large, purple-pink double blooms, accented by deep green glossy foliage; large upright habit with attractive form and vigor; deadhead to encourage new blooms throughout the season

Ornamental Features

Ruby Voodoo Rose is smothered in stunning fragrant double fuchsia flowers at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The spiny brick red bark adds an interesting dimension to the landscape.

Landscape Attributes

Ruby Voodoo Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees and butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Ruby Voodoo Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Growing With You Since 1926

Planting & Growing

Ruby Voodoo Rose will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
