Height: 10 inches

Spread: 12 inches

Spacing: 16 inches

Sunlight: ○ ◐

Hardiness Zone: 6b

Other Names: Creeping Jenny

**Description:**

A spectacular groundcover choice, vigorous yet not overly aggressive, with spectacular green and yellow leaves all season and dense groupings of yellow-gold flowers throughout the summer; a colorful groundcover that is short growing and very floriferous

**Ornamental Features**

Waikiki Sunset Loosestrife is smothered in stunning lightly-scented yellow cup-shaped flowers with gold eyes along the stems from late spring to mid summer. Its attractive oval leaves remain green in color with showy yellow variegation throughout the season.

**Landscape Attributes**

Waikiki Sunset Loosestrife is a dense spreading perennial with a ground-hugging habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Waikiki Sunset Loosestrife is recommended for the following landscape applications;

- Border Edging
- Groundcover
- Container Planting
- Bog Gardens

**Planting & Growing**

Waikiki Sunset Loosestrife will grow to be about 10 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 16 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Waikiki Sunset Loosestrife is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
