Height: 5 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 5a

Group/Class: Hybrid Tea Rose

**Description:**

A lovely, long lasting, fragrant selection, featuring classically shaped, two-tone pink blooms; deep green, dense, semi-glossy foliage has very good disease resistance; adds great color to beds, borders or arrangements

**Ornamental Features**

Wedding Bells Eleganza Rose is smothered in stunning fragrant double pink flowers with shell pink overtones at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

**Landscape Attributes**

Wedding Bells Eleganza Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Wedding Bells Eleganza Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Growing With You Since 1926

**Planting & Growing**

Wedding Bells Eleganza Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
